

IN THE CLAIMS

Please cancel claim 17. Please amend claims 1, 5, and 21. Please enter new claims 27 and 28.

1. (Currently Amended) A golf club head for an iron-type golf club comprising:
a club head portion having a front face, a sole, a toe, and a heel
portion, said heel defining a front heel face ~~which defines~~ defining a plane and
which intersects at a single point a plane defined by said front face of said club head
portion ~~said club head portion further defining a gap beneath said heel~~; and,
an aperture defined in at least one of said front face or a rear face of said
heel portion.

2. (Previously Amended) A golf club head according to claim 1 wherein said club
head further comprises a hosel having a first end and a second end, a first end of the
hosel reversibly engaging said aperture in a second end of said hosel adapted for
receiving a shaft.

3. (Canceled)

4. (Original) The golf club head according to claim 1 wherein said heel face further
defines a wedge-shaped member, said wedge-shaped member having a bore
therethrough, said bore in alignment with said aperture, said bore and said aperture
adapted for receiving a first end of a hosel.

5. (Currently Amended) A golf club comprising:
a club head having a front face, a sole, a toe, and a heel, said heel defining an
aperture adapted for receiving a hosel therein and extending through at least one of a
front face or a rear face of said heel, ~~said club head defining a gap beneath said heel,~~
~~said aperture adapted for receiving a hosel therein~~ said heel defining an upper edge
and a lower edge, said upper edge and said lower edge being parallel and said heel
having a height less than a height of said club head; and,

said front face of said heel defining a plane which intersects a plane defined by said front face of said club head.

6. (Original) The golf club according to claim 5 wherein said aperture extends from a front surface of said heel.

7. (Previously Amended) The golf club according to claim 5 wherein said aperture extends from a rear surface of said heel to a front surface of said heel.

8. (Canceled)

9. (Canceled)

10. (Previously Amended) A golf club comprising:

a club head having a front face, a sole, a toe, and a heel, said heel defining a bore extending into a rear surface of said heel, said heel defining at least one of a front heel face or a rear heel face having a plane which intersects a plane defined by said front face of said club head; and,

an angled hosel having a first end inserted into said bore defined by said rear surface of said heel and a second end which extends from said rear heel surface and which is attached to a shaft.

11. (Previously Amended) A golf club according to claim 10 wherein said club head defines a gap beneath said heel.

12. (Canceled)

13. (Canceled)

14. (Previously Amended) A golf club according to claim 10 wherein said bore is perpendicular to said rear surface of said heel.

15. (Previously Amended) A golf club according to claim 10 wherein said bore defines a non-perpendicular angle to said at least one of said front surface or said rear surface of said heel.

16. (Canceled)

17. (Canceled)

18. (Previously Added) The golf club according to claim 10 wherein a lower edge of said club face defines a plane parallel to a plane defined by a lower edge of said heel face.

19. (Previously Added) A golf club according to claim 1 wherein said bore is perpendicular to said rear surface of said heel.

20. (Previously Added) A golf club according to claim 11 wherein said bore defines a non-perpendicular angle to said at least one of said front surface or said rear surface of said heel.

21. (Currently Amended) A golf club comprising:

the club head having a front face, a sole, a toe, and a heel portion, ~~said club head defining a gap beneath said heel;~~

a hosel extending from an aperture defined by at least one of a front surface or a rear surface of said heel, said at least one front surface or rear surface of said heel further defining a flat planar surface surrounding said aperture, said flat planar surface defining a plane which intersects at a single point the plane defined by said front face of said club head.

22. (Previously Added) A golf club according to claim 21 wherein said aperture extends from a front surface of said heel.
23. (Previously Added) A golf club according to claim 21 wherein said aperture extends from a rear surface of said heel.
24. (Previously Added) A golf club according to claim 21 wherein said aperture extends from a rear surface of said heel to a front surface of said heel.
25. (Previously Added) A golf club according to claim 21 wherein said aperture is perpendicular to said flat planar surface.
26. (Previously Added) A golf club according to claim 21 wherein said aperture defines a non-perpendicular angle relative to said flat planar surface.
27. (New) The golf club according to claim 21 wherein said heel defines an upper edge and a lower edge, said upper edge and said lower edge being parallel, said heel having a height less than a height of said club head.
28. (New) A golf club comprising:
the club head having a front face, a sole, a toe, and a heel portion;
a hosel extending from an aperture defined by at least one of a front surface or a rear surface of said heel, said at least one front surface or rear surface of said heel further defining a flat planar surface surrounding said aperture, said flat planar surface defining a plane which intersects the plane defined by said front face of said club head, said heel further defining an upper edge and a lower edge, said upper edge and said lower edge being parallel, said heel having a height less than a height of said club head.
